Research Profile

My research interests focus on computer vision, pattern recognition and machine learning for person detection and tracking, person re-identification and face recognition.

I am currently an Assistant Professor, L.240/2010 A.24 C.3 lettera a), at the University of Pavia. From 2012 to 2017, I have been Postdoctoral Researcher at the Media Integration and Communication Center of the University of Florence. I received the PhD degree in Computer Engineering, Multimedia and Telecommunication from the University of Florence in 2012 under the supervision of Prof. Alberto Del Bimbo. I have published more than 30 papers in the most prestigious journals and conferences in computer vision, and pattern recognition and I received the best paper award at the IEEE Computer Society Workshop on Biometrics 2017. I am the lead organizer of the International Workshop on Cross-domain Human Identification (ICCV'17) and I gave a tutorial at a conference of international relevance.

I am involved in research collaborations with other research centers, both national and international and I have actively been participating in various roles in several research projects and a number of industry-funded projects.
